Safer to operate
- Exclusive Erlab filtration technology combining activated carbon and HEPA/ULPA to adapt to the manipulation
- Meets AFNOR NFX 15 211/ANSI Z9.5-2012 filtration efficiency standard (class 1 and 2)
- Real time sensors to detect main filter saturation with solvents, acids or formaldehyde
- Safety filter in case of main filter saturation
- Air face velocity permanent monitoring
- Erlab Safety Program: application analysis and validation, usage framework certification, usage follow-up
- Connected device allowing reception of safety notifications and use status

Simpler to use
Real time status communication by light and sound pulses:
- Air face velocity decrease
- Main filter saturation
- Fan failure
- Excess scheduled working time

Flexibility
- Modular filtration column adapting to application changes
- Easy and fast relocation

Savings
- No ductwork cost
- Annual energy cost < 100 €
- Compared to an extraction fume cupboard, energy savings compensate filter replacement cost

Environment
- No chemical release into the atmosphere
- Low energy consumption

Ask for the highest level of filtration performances
Powerful light guided communication
Connect your equipment and benefit from the remote access thanks to our mobile solutions

</table>

Please add 150mm between the last filter and the ceiling to allow a good air recirculation and to replace filters easily.

Work surfaces with built in spill tray

- Tempered glass
- Trespa® Top Lab®PLUS
- 304 L stainless steel

Benchcap: fixed work bench

Mobicap: mobile rolling cart
**Filtration Technology**

- Carbon filtration for gases and vapours
  - AS: For organic vapours
  - BE+: Polyvalent for acid + organic vapours
  - F: For formaldehyde vapours
  - K: For ammonia vapours

- Particulate filtration for powders
  - HEPA H14: 99.995% efficiency filtration of particles over 0.1 µm in size
  - ULPA U17: 99.99995% efficiency filtration of particles over 0.1 µm in size

**Ventilation**

- Molecode
- Automatic alarm to detect filter saturation

**Equipment**

- **Communication interface**: Simple communication by audible and light pulses: unit running time, air face velocity, automatic filter saturation detection, ventilation settings, fan failure alarm
- **Filtration technology**: 1 column that can be configured to handle liquids, powders, or both
- **Carbon filtration for gases and vapours**: Following filtration column configuration (see table above)
- **Particulate filtration for powders**: Following filtration column configuration (see table above)
- **eGuard**: APP for remote control to monitor the hood, change the settings, and deliver safety alerts immediately to your devices (mobile, tablet and PC)
- **Internal lighting**: LED lighting > 650 Lux
- **Anemometer**: Air face velocity alarm
- **Anemometer**: Air face velocity indicator
- **Chemical Listing**: List of approved chemicals

**Accessories**

- **Work Surfaces**: Trespa® Top Lab® plus, Glass or 304L Stainless Steel
- **Molecode**: Detection sensor for: Type S, for solvents / Type A, for acids / Type F, for formaldehyde
- **Benches**: Mobile (Mobicap) or fixed (Benchcap)
- **Bench equipment**: Technical gases outlets, water outlets, front control valves, sink, power sockets (Only compatible with Trespa® Top Lab® plus worktop and fixed bench)
- **Particulate Pre-filter**: Protects the main filter(s) from dust
- **Transparent Back Panel**: Clear acrylic panel for easy viewing

--

**Safety Standards**

- DIN 12 927: Germany - EN 1822:1998 (HEPA H14 & ULPA U17 Filters) - CE Marking

**Technical Specifications**

- **Air Flow**: 220 m³/h - 135 CFM
- **Air Face Velocity**: 0.4 to 0.6 m/s - 79 fpm to 118 fpm
- **Voltage/Frequency**: 220 V / 50-60 Hz
- **Power consumption**: 65 W
- **Sash openings**: Oblong
- **Structure**: Corrosion resistant electro-galvanized steel coated with anti-acid polymer
- **Side and front panels**: Chemical resistant acrylic
- **Filtration module**: Polypropylene

**Customized filtration column**

- Class I according to the NF X 15-211
- Class 2 according to the NF X 15-211

**Available filters**

- C: Carbon filtration for gases and vapours
- E: Participulate filtration for powders
- HEPA H14: 99.995% efficiency filtration of particles over 0.1 µm in size
- ULPA U17: 99.99995% efficiency filtration of particles over 0.1 µm in size

**Class I**

- According to the NF X 15-211 (minimum protection)

**Class II**

- According to the NF X 15-211 (maximum protection)

**Maximum protection**

- In the event of filter saturation, the ventilation alarm is automatically activated.
We provide safety, we protect your health

Erlab invented the ductless fume hood in 1968. With more than 50 years of experience in the field of chemical filtration and protection of laboratory personnel, we know the formula for safety. With Erlab, you will never have to wonder or worry if our products are safe. We build each one of the following 7 ingredients into our products, and without all of them, your health and safety will be compromised.

1. Erlab R&D Laboratory
   The engineers and chemists in our state-of-the-art R&D laboratory understand molecular filtration. We are committed to designing products that are safe and of the highest quality, strive to improve our products, and continuously develop new products that provide greater protection in the laboratory.

2. Strict Safety Standards
   We hold ourselves to the highest standard and adhere to the strict AFNOR NF X 15-211: 2009 filtration safety standard as endorsed by ANSI Z9.5-2012.

3. A Published Chemical Listing
   It all begins here. Without this listing, we are not compliant with AFNOR NFX 15-211. Our in-house laboratory tests, as well as independent testing, to verify the retention capacity of over 700 chemicals for our filters.

4. Independent Testing
   Erlab filters have been independently tested multiple times at various concentrations guaranteeing that our safety solutions all adhere to the strict performance criteria of the AFNOR NF X 15-211:2009 standard assuring that the emission concentration at the filter exhaust will always be lower than 1% of the TLV.

5. Application Questionnaire (Valiquest)
   Our laboratory specialists will recommend the appropriate filtration fume hood, type of filter, and personalized advice.

6. Certificate of Validation for the chemicals used in the hood
   A certified PhD chemist issues a Certificate of Validation with a list of the chemicals approved for use in the hood.

7. Our Safety Program
   We back up our products 100%. This program includes your specialized chemical evaluation, validation of your hood upon installation, and a filtration safety specialist at your service to ensure that your hood is operating to its full potential.

About Erlab

Erlab’s state-of-the-art Research & Development Laboratory relies exclusively on filtration.

Erlab’s state-of-the-art Research & Development Laboratory relies exclusively on filtration.
