Product datasheet

Captair 392 Smart
Ductless filtering fume hoods

Safer to operate
- Exclusive Erlab filtration technology combining activated carbon and HEPA/ULPA to adapt to the manipulation
- Meets AFNOR NFX 15 211/ANSI Z9.5-2012 filtration efficiency standard (class 1 and 2)
- Real time sensors to detect main filter saturation with solvents, acids or formaldehyde
- Safety filter in case of main filter saturation
- Air face velocity permanent monitoring
- Erlab Safety Program: application analysis and validation, usage framework certification, usage follow-up
- Connected device allowing reception of safety notifications and use status

Simpler to use
Real time status communication by light and sound pulses:
- Air face velocity decrease
- Main filter saturation
- Fan failure
- Excess scheduled working time

Flexibility
- Modular filtration column adapting to application changes
- Easy and fast relocation

Savings
- No ductwork cost
- Annual energy cost < 100 €
- Compared to an extraction fume cupboard, energy savings compensate filter replacement cost

Environment
- No chemical release into the atmosphere
- Low energy consumption
Heights according to the filtration column configuration

<table>

<tr>
<td>Type 2C or 1P1C or 1C1P</td>
<td>1435</td>
</tr>
<tr>
<td>Type 1P2C or 1P1C1P</td>
<td>1515</td>
</tr>
</tbody>
</table>

Please add 150mm between the last filter and the ceiling to allow a good air recirculation and to replace filters easily.

Work surfaces with built in spill tray

- Tempered glass: 904 mm x 585 mm
- Trespa® Top Lab®: 875 mm x 644 mm
- 304 L stainless steel: 855 mm x 648 mm

Benchcap: fixed work bench

Mobicap: mobile rolling cart

Dimensions:
- 1065 mm (without work surface)
- 1052 mm (with work surface)
- 2425 mm max
- 2250 mm min
- 95 1/2 max
- 88 5/8 min

Dimensions:
- 2400 mm max
- 2225 mm min
- 94 1/2 max
- 87 5/8 min
Captair 392 Smart
Ductless Filtering Fume Hoods

Modular design of the filtration column allows to adapt to every protection needs

### Communication interface
Simple communication by audible and light pulses: unit running time, air face velocity, automatic filter saturation detection, ventilation settings, fan failure alarm

### Filtration technology
2 columns that can be configured to handle liquids, powders, or both

### Carbon filtration for gases and vapours
Following filtration column configuration (see table above)

### Particulate filtration for powders
Following filtration column configuration (see table above)

#### eGuard
APP for remote control to monitor the hood, change the settings, and deliver safety alerts immediately to your devices (mobile, tablet and PC)

#### Internal lighting
LED lighting > 650 Lux

#### Anemometer
Air face velocity alarm

#### Anemometer
Air face velocity indicator

#### Chemical Listing
List of approved chemicals

### Accessories

Erlab’s state of the art Research & Development Laboratory relies exclusively on filtration

About Erlab

We provide safety, we protect your health
Erlab invented the ductless fume hood in 1968. With more than 50 years of experience in the field of chemical filtration and protection of laboratory personnel; we know the formula for safety. With Erlab, you will never have to wonder or worry if our products are safe. We build each one of the following 7 ingredients into our products, and without all of them, your health and safety will be compromised.

1 Erlab R&D Laboratory
The engineers and chemists in our state-of-the-art R&D laboratory understand molecular filtration. We are committed to designing products that are safe and of the highest quality, strive to improve our products, and continuously develop new products that provide greater protection in the laboratory.

2 Strict Safety Standards
We hold ourselves to the highest standard and adhere to the strict AFNOR NF X 15-211: 2009 filtration safety standard as endorsed by ANSI Z9.5-2012.

3 A Published Chemical Listing
It all begins here. Without this listing, we are not compliant with AFNOR NFX 15-211. Our in-house laboratory tests, as well as independent testing, to verify the retention capacity of over 700 chemicals for our filters.

4 Independent Testing
Erlab filters have been independently tested multiple times at various concentrations guaranteeing that our safety solutions all adhere to the strict performance criteria of the AFNOR NF X 15-211:2009 standard assuring that the emission concentration at the filter exhaust will always be lower than 1% of the TLV.

5 Application Questionnaire (Valiquest)
Our laboratory specialists will recommend the appropriate filtration fume hood, type of filter, and personalized advice.

6 Certificate of Validation for the chemicals used in the hood
A certified PhD chemist issues a Certificate of Validation with a list of the chemicals approved for use in the hood.

7 Our Safety Program
We back up our products 100%. This program includes your specialized chemical evaluation, validation of your hood upon installation, and a filtration safety specialist at your service to ensure that your hood is operating to its full potential.
